

Hello.

I would like to send in my concerns regarding NECA's decision over the rate of compensating providers of video relay service. The cut was dramatic and it is starting to impact the providers and their service.

Accessibility is the issue here and again, we would like to have equal accessibility as the hearing people does. I don't want to see limited hours of usage regarding video relay service. I implore FCC to review NECA's recommendation and reverse it for the best benefit of deaf people.

Thank you.
